Shared exogenous seed
News or momentum
Six agents; 40 ticks
Five conditions
naive · punitive · label
evidence · placebo
Paired seeds by model
DeepSeek: 20
Haiku: 10 · Luna: 10
Base action and cited features
Rules, persona and portfolio
Completed history, latest feedback
Current features
50% measurement mask
Re-ask news, then momentum
Each feature: v → −v
One byte-identical null re-ask
20% of measurement-selected decisions
Only base actions trade
Audit feedback → next prompt
Nulls: diagnostics + secondary sensitivity
Primary ticks 20–39: matched coordinates → equal-seed contrasts
Four-test Holm family per model; raw counterfactual outcomes
